

**BATTERY CHARGER WITH AUTOMATIC CUSTOMER
NOTIFICATION SYSTEM**

ABSTRACT OF THE DISCLOSURE

5 A battery charger with an automatic
customer notification system is provided. The battery
charger includes battery charging circuitry which is
configured to couple to a battery, and to provide a
charging signal to the battery. The battery
charger also includes communication circuitry,
10 coupled to the charging circuitry, that is configured
to transmit a signal to an external device upon
receipt of a charge status code from the battery
charging circuitry.
